Launching of New Website

The FSC is pleased to announce the launching of its New Website on Tuesday 30 August 2011. This website has been designed in an innovative structure to be an effective interface between the FSC and its stakeholders.

This dynamic New Website provides a more friendly navigation for licensees and investors already familiar with the Mauritius non-banking financial sector and as well as for new investors and potential applicants.

The website aims *inter alia* to:

- provide flexibility to convey the latest regulatory information;
- promote interaction with licensees and stakeholders;
- provide an efficient window of communication to local and international community; and
- reinforce the position of Mauritius jurisdiction as an International Financial Centre reflecting a sound regulatory framework, international norms and standards, professionalism and effective disclosure of information.

During the Website launching ceremony held at FSC House today, the FSC Chief Executive, Ms. Clairette Ah-Hen said that:

“Today’s regulator needs to respond to the demand of its stakeholders and changes in its economic environment. This Website’s ease of use and design is an efficient solution to take advantage of the new technological infrastructure and will improve transparency.”
